

Utensil Holder

Measured 4.5 x 4.5 x 6.5 in | agreed maximum 5 x 5 x 7 in (width x depth x height)

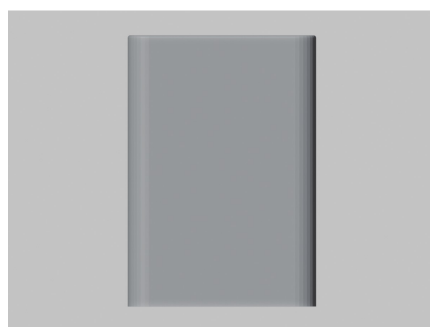

A utensil holder for the counter that doesn't pool water in the bottom, with a divider so whisks and spatulas don't tangle yes, build to that

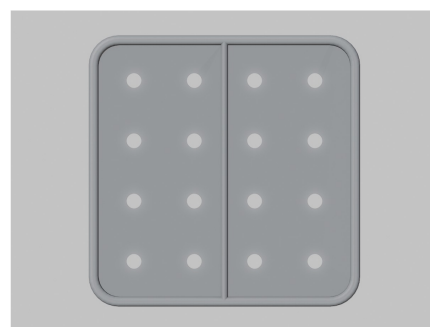

Angled

Side

Top

How it is built

Build steps (9)

1. outline "body_profile" on the top plane: rect, 4.5 x 4.5 in, 0.5 in corners
2. build "body" 6.5 in out from outline "body_profile"
3. hollow "hollow" to 0.16 in walls, open at the top
4. outline "divider_profile" on the right plane: rect, 4.26 x 6.38 in
5. build "divider" 0.12 in either side of outline "divider_profile"
6. drill "drain" 0.25 in, straight through, into the bottom
7. repeat "drain_row" 4 times along x, 1 in apart
8. repeat "drain_grid" 4 times along y, 1 in apart
9. round "soften_rim" the top rim to 0.06 in
